**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6,7 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6, 'said block' lacks antecedent basis. Claims 6 and 7 'in an axis' should be 'along an axis'. And it is unclear how the block and holder are movable relative to the blocking apparatus since the block and holder are part of the entire blocking apparatus.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,5-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Benz et al.-5080482.

Benz discloses a blocking apparatus having a blocking pin (6) a workpiece holder (8) having a recessed formed therein for holding a lens, a seat stage (9) having a surface for engaging the holder to flexibly position on the seat stage (along X-Y axis),

wherein said blocking pin is vertically movable with respect to the stage/holder and wherein the holder is movable along a horizontal axis when engaged by said pin (312).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 rejected under 35 U.S.C. 103(a) as being unpatentable over Benz et al.-  
5,080,482, alone.

Benz does not specifically show a 'chamber' on seat stage for interfacing with holder. However, any type of structure, such as a chamber, that would allow proper fitting would be an obvious design expedient and within the level of one having ordinary skill in the art.

Claim 4 rejected under 35 U.S.C. 103(a) as being unpatentable over Benz et al.-  
5,080,482 in view of Shay-6,045,438.

Benz does not disclose the holder having a regulating air space therein. However, Shay teaches it is well known to use lens blocks having a pressure regulated holder to enable such operations as suction/vacuum in order to properly maintain lens onto the holder. Therefore, it would have been obvious to one of ordinary skill in the art at time invention was made to use a holder with air pressure regulating means, as taught by Shay, in the apparatus disclosed by Benz in order to precisely maintain lens with respect to the holder.
